

ELECTRICAL WALK THROUGH CHECKLIST

This is a guide to help you when you go to order lighting. Please list the number of lights you will need in the spaces provided during your electrical walk through.

KITCHEN

- 5 Wafer lights on a flat ceiling are included and can be used anywhere but most people place them in the kitchen.
- Pendants _____ (how many). If on a sloped ceiling, they should be on a chain and not a rod.

LIVING ROOM OR GREAT ROOM

- Sconces _____ (how many) Some people choose to use these on walls rather than ceiling lighting or get switched outlets for lamps. Prepare in advance so you can measure furniture as to where the switched outlets should be.
- Ceiling fans _____ (how many) 2 ceiling fan hookups are included on a flat ceiling.
- If you have a Cathedral ceiling, you will need a down rod of probably 18".

DINING ROOM

- Usually hung in the middle of the room but you may want to measure your table prior to the electrical walk-through _____ (how many).

BREAKFAST AREA

- Usually hung in the middle of the breakfast area but you may want to measure your table prior to the electrical walk through _____ (how many).

FOYER

- Usually is on a chain but not always. Ask the electrician if there is a size light that is the maximum length so it does not interfere with the front door _____ (how many) _____ (max length).

BATHROOMS

- Master bath-you can use 1 or 2 lights over the vanity. _____ (how many) A fan/light combo is included and they are switched separately.
- The main bath would follow the same guidelines as the master _____ (how many).
- A half bath fan is provided and you will need a light over vanity.

ELECTRICAL WALK THROUGH CHECKLIST

CLOSETS/PANTRY

- Walk-in closets are provided with wiring and a switch but the light needs to be chosen by you. Nate (our electrician) offers a very nice LED disk light that is at a reasonable cost. Lights needed for closets/pantry _____ (how many).

BEDROOM LIGHTS

- All bedrooms must have either a switched outlet or overhead lighting that operates with a switch by building code. If you are installing fans in the bedroom and do not want lights in them, you must install switched outlets by code.
- The number of lights and ceiling fans.
 - Master Bedroom _____ (light/s) _____ (fan/s)
 - Bedroom 2 _____ (light/s) _____ (fan/s)
 - Bedroom 3 _____ (light/s) _____ (fan/s)
 - Bedroom 4 _____ (light/s) _____ (fan/s)

HALL LIGHTS

- You should have one light per hallway minimum and if there is a landing at the top of a staircase, you will also need one there. Number of lights needed for hallways _____ (how many).

LAUNDRY AREA

- Number of lights for laundry _____ (how many). Disk lights are also very popular in this area.

INTERIOR GARAGE & INTERIOR BASEMENT LIGHTS

- Supplied for you and included in your S. Gerald Musser home.

EXTERIOR

- One light is needed for each exterior door. A spotlight on exterior is included.
 - Porch _____ (how many)
 - Side Door _____ (how many)
 - Rear Door _____ (how many)
 - Garage Door _____ (how many)
 - Walk out Basement _____ (how many)
